

Temple Mills Depot

During January 2006 Balfour Beatty Rail Projects awarded Ultra Electronics PMES a contract for design, manufacture, and supply of one off Transformer Rectifier Unit and Earth Return Equipment. This equipment will form part of the traction supplies installed at the Temple Mills Depot the new home for the Eurostar Rolling Stock.

In addition to the Transformer Rectifier Unit, the contract also includes the provision of Return Traction Bar Cubicles, Earth Connection Cubicles and DC Stray Current Monitoring Cubicles.
