

DC Power System Specialists

Ultra Electronics Limited PMES is an experienced UK based engineering company supplying high quality DC Power systems and stand-alone Transformer Rectifier Units for traction applications.

With over 50 years design and application experience within the traction market, Ultra Electronics PMES has supplied equipment to Network Rail (UK), London Underground, Copenhagen Minimetro, Dublin Light Rail, and many other overseas transit authorities.

PMES offer **turnkey DC Substation systems** which include:

- system design and integration
- project management
- equipment supply (scope includes modular buildings, transformers, rectifiers, AC, DC & LV switchboards, SCADA, and auxiliary equipment)
- installation and commissioning
- civil works & cabling

PMES' **Products** include:

- Transformer Rectifier Units (TRU)
- voltage-controlled rectifiers/inverters
- mimic panels
- control and protection panels
- depot battery chargers
- and other ancillary equipment
